Real-time Location Tracking 📍

Screen Time Monitoring 📵

Emergency SOS Button 🚨

Safe Zone Alerts 🚦

Problem statement

Parents struggle to manage their children's screen time, app usage, and online safety due to a lack of intuitive monitoring tools. Existing solutions often lack real-time tracking, flexibility, and ease of use. The Kids Tracker App addresses this by providing a user-friendly platform for managing screen time, tracking location, and ensuring digital well-being.

Solution statement

The Kids Tracker App offers a comprehensive solution for parents to monitor and manage their child's digital activity. With features like app usage tracking, location monitoring, screen time limits, and direct control options, the app ensures a balanced and safe digital experience. Its intuitive interface allows parents to set restrictions, track real-time activity, and promote healthy screen habits, fostering both safety and responsible device usage.

Quantitative Research

We conducted a survey targeting parents and guardians to gather quantitative insights into their preferences and behaviors regarding child safety and tracking solutions. The data revealed patterns and trends, guiding our design decisions to create features tailored to their needs and enhance the child monitoring experience.

Observations

72%

of parents find geofencing alerts essential, ensuring notifications when their child enters or leaves a designated area.

55%

of users feel that existing child tracking solutions lack sufficient emergency response features.

68%

of parents rely on tracking apps to monitor their child's location, highlighting the need for real-time tracking and instant alerts.

62%

of users express concern about data security, highlighting the importance of encryption and privacy controls in tracking applications.

47%

of users believe current tracking apps are too complex, emphasizing the need for a simple and user-friendly interface.

User persona

1

Aditi Sharma

The Working Parent

Age/Identifying Gender : **34 / Female**

Location : **Bangalore**

Occupation : **Senior Software Engineer**

About

I'm Aditi Sharma, a full-time working mother balancing a demanding job and family life. I often worry about my kids' safety when they travel to school or extracurricular activities.

Goals & Needs

- Ensure my children's safety by tracking their location in real-time.
- Get instant alerts when they reach or leave a designated area.
- Have an emergency communication feature for quick response.

Pain Points & Frustrations

- Constant worry about my children's safety when they are away.
- Lack of real-time updates in existing apps.
- Difficulty managing multiple tracking tools or switching between apps.
- Battery drainage issues in tracking apps.

"Juggling work and parenting is tough, but ensuring my kids are safe should be easy. I need a smart and efficient way to stay connected with them without disrupting my work."

Pain Points & Frustrations

- Fear of losing track of my child when I'm away for work.
- Existing apps are either too complex or unreliable.
- Delayed location updates make tracking inefficient.

"My child's safety is my top priority, but my work demands my time. I need a smart and trustworthy solution that keeps me connected without adding stress."

About

I'm Rajesh Kumar, a busy entrepreneur managing my retail business. My work often keeps me occupied, and I travel frequently, making it difficult to personally monitor my child's safety.

Goals & Needs

- Monitor my child's location without constant phone calls.
- Have an SOS feature in case of emergencies.
- Get insights into daily routes

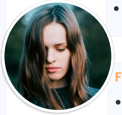
Location : **Mumbai**

Occupation : **Business Owner**

Empathy mapping

Says

- I need to make sure my child is safe at all times.
- If there's an emergency, my child should be able to reach me instantly.
- Privacy and security are important—I don't want data leaks.
- I want real-time updates without battery drain.



DOES

- Frequently checks his phone for location updates.
- Calls his child or the school if updates are delayed.
- Researches the best child-tracking apps available.

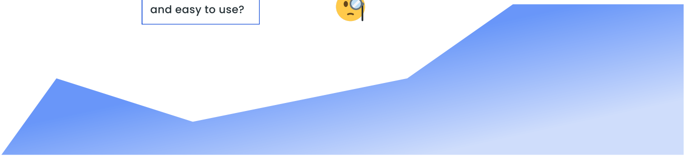
THINKS

- What if my child gets lost or something happens?
- Can I fully trust this app to work all the time?
- I hope my child follows the planned routes.
- I don't want my child to feel like I'm invading their privacy.

FEELS

- Anxious – Worried about his child's safety when away.
- Overwhelmed – Balancing work responsibilities and parenting.
- Hopeful – Looking for a reliable, stress-free solution.

User Journey map



Tasks	Interest	Explore	Set up	Tracking	Peace of mind
Feelings and thoughts	I worry about my child's safety, especially when they're outside. I need a solution.	There are so many apps. Which one is reliable, secure, and easy to use?	Is the setup easy? I hope I can figure out how to use it quickly. 🧐	Great! I can see where my child is. But is the location always accurate?	I feel so much better knowing my child is safe!
Opportunities	Educate users on the app's benefits through marketing and awareness campaigns.	Clear website and app store descriptions, user testimonials, and security assurances.	Provide a simple onboarding process with step-by-step guidance and tooltips.	Optimize GPS accuracy, reduce battery drain, and provide instant notifications.	Provide customization for alerts, emergency contact options, and in-app communication.
